

# National Association of Construction Frameworks

## About us:

The National Association of Construction Frameworks (NACF) is playing a unique role in leading the ongoing adoption of best practice in local government. Building on our past successes, the NACF is working together with the Local Government Association (LGA) to help shape the future of local government construction. Between us, we deliver over £1.4bn of construction work a year, and in the last two years alone, £1.5bn of that been delivered via ‘two stage open book’, one of the Government Construction Strategy recommended collaborative routes.

## Objectives:

### Advocacy

- ✓ Maintenance of framework information - central database for regional information
- ✓ Support for the Government Construction Strategy
- ✓ Sharing of best practice - expertise and knowledge
- ✓ National voice - in central and local government

### Management and measurement

- ✓ Contractor workload and performance
- ✓ Demonstration of benefits to public bodies:
  - cost, time, sustainability and social value

### Innovation and development

- ✓ Benchmarking
- ✓ Best in class design, procurement and delivery

## The NACF is actively supporting delivery of Local Government Construction through:

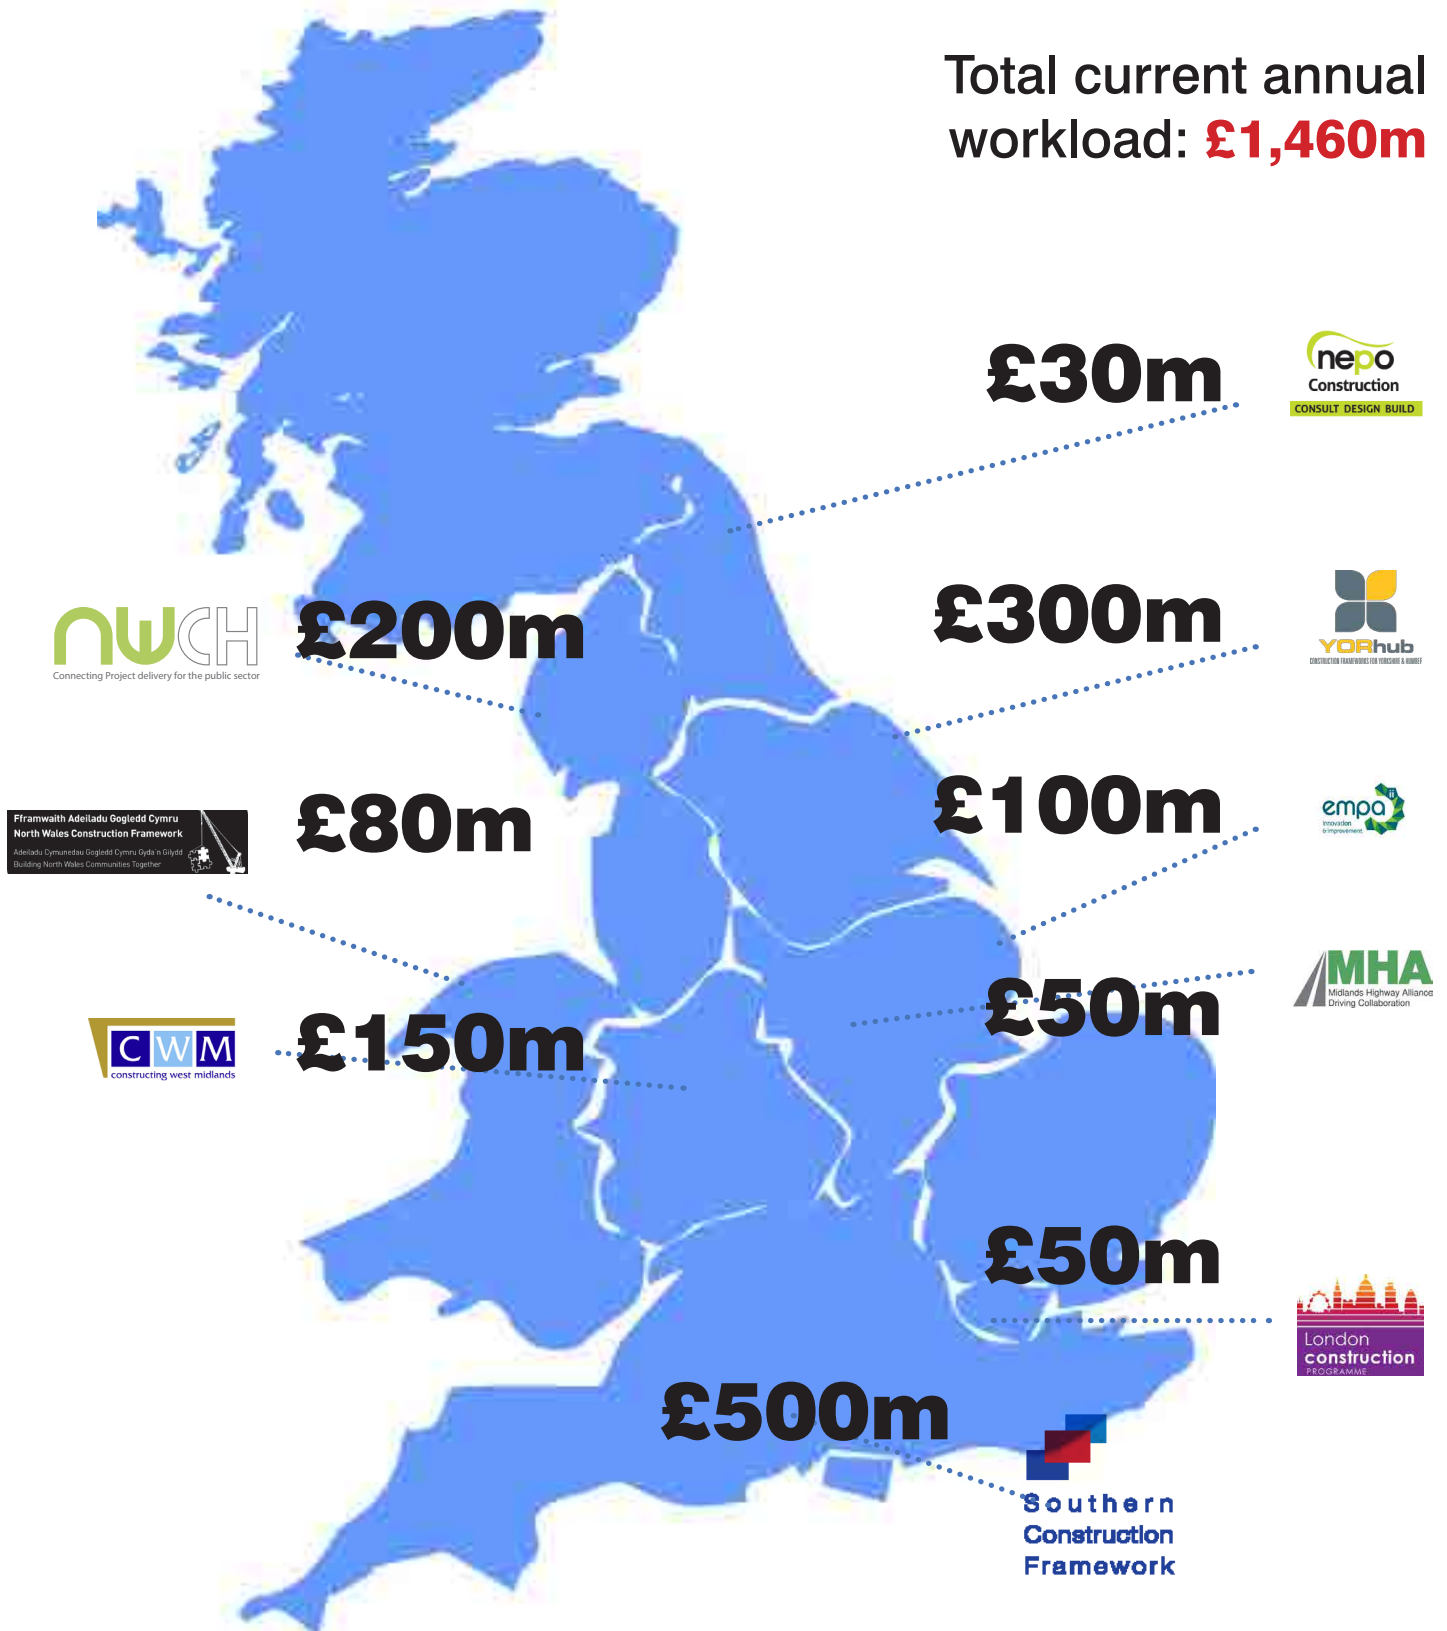

- Nationally agreed KPI's
- Quarterly Market Intelligence
- Leadership BIM for Local Government
- “Effective Frameworks” expertise
- Fair Payment
- Support for PAS 91
- Supply Chain developments
- Construction cost benchmarking
- Adding Social value through construction
