

# NACF KPI Review v. National Average

(Based on 600 projects with a construction value of £1.2bn)

Serving the Public Sector

The NACF partners have again collaborated to provide an overview of framework performance across the country. The following slide reveals strong performance against a number of key industry KPIs. The results, of which are based on over 600 projects with a combined value of £1.2bn, show frameworks, which operate a 2 stage collaborative process, outperforming national averages reported by Glenigan in the 2016 'UK industry Performance Report'.

The strong performance reiterates the NACF's commitment to 2 stage procurement and collaborative working processes which continues to deliver excellent KPI results when compared to traditionally procured projects.

Note - National figures derived from 2016 CITB UK industry performance report from Glenigan.
